SMARTCITY – CHIKAMAGALURU

ABSTRACT

The SmartCity – Chikamagaluru platform is a web-based city information and service management system designed to provide a centralized digital gateway for residents, tourists, and business visitors. The system showcases the city's history, tourist attractions, businesses, markets, transportation facilities, government updates, and local events.

It integrates interactive city maps, secure user registration, discussion forums, and monetized premium services to create a sustainable digital ecosystem. Developed using Spring Boot/Spring MVC, MySQL, and ReactJS or Thymeleaf with Hibernate ORM, the platform ensures scalability, security, and user-friendly navigation.

TARGET USERS

A. General Users – Anyone looking for city information, residents, students.

B. Tourists – Tourist places, hotels, transport, maps, and event updates.

C. Business Visitors – Market trends, business directory, investment opportunities, government notices.

SYSTEM MODULES

1. Login & Registration – Secure authentication with role-based access and profile management.

2. Administrator Panel – Manage users, approve business listings, post news and updates.

3. City Map – Static and live maps with key markets, tourist spots, hospitals, and routes marked.

4. City History – Social, political, cultural, and economic background of the city.

5. Search & Site Map – Global search and structured navigation for easy access.

6. News & Events – Local news, government notices, cultural programs, business updates.

7. Forums – Discussion boards, chat system, expert Q&A, polls, and communication tools.

REVENUE MODEL (PAID SERVICES)

1. Premium Business Listings – Featured advertisements and verified badges.

2. Market Daily Rates Subscription – Access to daily coffee and agricultural commodity prices.

3. Premium City News Alerts – SMS/Email notification subscription service.

4. Advertisement Space – Banner ads and sponsored posts for businesses.
